

Devi Prasana Mishra

Software Developer | Python | Django | MySQL | AWS S3 | Backend Systems

Phone: +91-8763243097 | Email: deviprasan25803@gmail.com | LinkedIn: linkedin.com/in/devi-prasana-mishra-606064bb

PROFESSIONAL SUMMARY

Software Developer with 2+ years of experience building scalable backend systems using Python and Django for healthcare, inventory management, and financial reporting. Proficient in MySQL database design, AWS S3 cloud integration, REST API development, and workflow automation. Experienced delivering enterprise-grade solutions at PDCloudEx for Metropolis Healthcare — one of India's largest diagnostic chains. Demonstrated ability to reduce operational inefficiencies, automate data pipelines, and implement role-based access control (RBAC) systems. Strong background in Agile development, cross-functional collaboration, and technical documentation.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Frameworks & Libraries: Django, Django REST Framework, REST API Development, Backend Development

Databases: MySQL, SQL Scripting, Database Design, Data Processing, Data Optimization, Query Performance Tuning

Cloud & DevOps: AWS S3, Cloud Storage Integration, Secure File Handling, File Upload/Download Automation

Security: Role-Based Access Control (RBAC), Authentication & Authorization, Secure Data Handling

Domain Expertise: Healthcare IT, Inventory Management, Stock Management Systems, Barcode Scanning Integration, Consumption Tracking, Financial Reporting

Tools & Practices: Workflow Automation, System Documentation, Process Flow Design, Reporting & Auditing, Excel Data Processing, Agile Methodology

Soft Skills: Cross-Functional Collaboration, Problem Solving, Client Communication, Attention to Detail

PROFESSIONAL EXPERIENCE

Software Developer – Stock Management System (Metropolis Healthcare) | PDCloudEx, Remote *May 2024 – Present*

- Architected Python/Django backend logic for a multi-hub real-time stock management system, enabling live inventory tracking across 10+ laboratory hubs and reducing stock discrepancies by 30%.
- Optimized daily consumption tracking workflows and improved inventory visibility across a multi-tier laboratory network, supporting operations teams in monitoring stock movement across 5+ facility levels.
- Developed and executed complex MySQL scripts to aggregate sub-project stock values into a consolidated master budget, eliminating manual reconciliation and improving financial calculation accuracy.
- Implemented barcode scanning integration and automated consumption-tracking workflows, reducing manual stock entry dependency by 40% and significantly improving data consistency across hubs.
- Led end-to-end resource activation deployment for 15+ new laboratory centers, automating synchronization with the central inventory database within 24 hours of center onboarding.
- Maintained alignment between physical stock and digital records through proactive platform enhancements, minimizing supply chain bottleneck risks across the network.

Software Developer – Test Code Costing Module (Metropolis Healthcare) | PDCloudEx, Remote *December 2023 – May 2024*

- Integrated AWS S3 for secure, scalable cloud storage of monthly diagnostic datasets, enabling automated upload and retrieval workflows for 35+ laboratory hubs and reducing data retrieval time by 50%.
- Built Python automation scripts to ingest and process 35+ monthly Excel files from laboratory hubs, cutting manual data consolidation effort by 60% and increasing data pipeline reliability.

- Developed staff management and user authentication system with role-based access control (RBAC), enforcing data security across 3 distinct permission levels for all organizational users.
- Implemented month-wise financial calculation backend logic, transforming raw diagnostic data into structured financial reports — directly accelerating monthly financial close cycles.
- Engineered upload activity tracking and audit reporting features, improving compliance visibility across all user submissions and supporting internal and regulatory audit workflows.
- Enhanced the costing analysis pipeline through improved data processing logic, surfacing actionable financial outputs that directly supported healthcare management decision-making.

EDUCATION

Bachelor of Technology (B.Tech) – Information Technology *Aug 2019 – Apr 2022*

Veer Surendra Sai University of Technology (VSSUT), Burla, Odisha

Diploma – Information Technology *Aug 2016 – May 2019*

Uma Charan Pattnaik Engineering School

CERTIFICATIONS

- AWS Academy Graduate – AWS Academy Cloud Foundations (Amazon Web Services)
- NDG Linux Unhatched – Cisco Networking Academy
- Python Programming – Complete Beginners Course Bootcamp 2022
- Complete Android Developer Course – Android 11 with Java
- Build Responsive Websites Using HTML5, CSS3, JavaScript and Bootstrap
